by **INDUPANEL**

 **INDUPANEL**  
*Doors & Innovation* **2000-2020**

INDUPANEL celebrates 20 years since its creation. 20 years that make this company a leader in the manufacture of aluminum and pvc panels. 20 years of experience and evolution in which the main premise has always been continuous improvement. This is achieved through a commitment to design and innovation, distinctive signs in all our products.

We want to thank all our clients for the support we have received during these 20 years, and invite you to join us for at least another 20!

At entrance doors, INDUPANEL goes further.

**DOORBLOCK** is a complete door system developed by **INDUPANEL**, integrating both the panel **door** (in a wide range of designs, dimensions and finishes), such as **frames** (one or two fixed sides, or upper side may be optionally added), and all kinds of **accessories** (knobs, lever handles and bar handles, both standard and integrated), security **locks**, visible or hidden **hinges** and the latest in home **automation systems** (opening by fingerprint or mobile application, removing architectural barriers and facilitating access for people with reduced mobility).

Everything is fabricated using top quality materials to ensure the safety and durability of the final product, looking for the customer's maximum satisfaction.

The high thermal performance of our different cores provides an insulation and energy savings that make this system compliant with Passivhaus standards.

**AVAILABLE CORES:**

- POLYURETHANE HDP
- PLYWOOD
- Puren HDP
- ISOLPLUS
- THERMIPANEL EPS/XPS

**FINISHES:**

- RAL LACQUERED
- WOODEN IMITATION LACQUERED
- DECORATIVE FOIL

**ÚNICA** is **INDUPANEL'S** most special collection. Inspired by a selection of large constellations whose names come from ancient Greek and Roman mythologies, the **ÚNICA** model's collection gathers the beauty and uniqueness of the stars and aim to somehow convey an extraordinary story full of strength and splendour.

Beyond the myths, fantastic beings, divine fighting's... the objective is achieving a different perception of the front door, seeking a conceptual transcendence.

With sets of reliefs, metal-imitating resins, and ad hoc pull handles, these models combine innovation, aesthetics and their own personality.

Enter a new galaxy of front doors.

## DOORBLOCK SYSTEM 70 PREMIUM

Complete bonded door system  
on both sides

- 70 mm frames
- Panel thickness: 70 mm
- Aluminium sheet thickness: 2.5 mm
- Glass thickness for fixed sides: 24, 45 and 54 mm  
(Consult other values)
- Core EPS ( $d=40 \text{ kg/m}^3$ )
- Maximum door height: 3,000 mm with visible hinges  
2,700 mm with hidden hinges
- Maximum door width: 1,800 mm with visible hinges  
1,500 mm with hidden hinges

Every system is mainly composed by:

- Aluminium frame and leaf in lacquered or decorative foil
- Flush frame and leaf
- Triple joint
- Solid panel or panel with triple laminated glass and double chamber for better insulation
- Thermal seal with shear-free insulating profile (p. 15)
- 3 or 5 points lock
- Visible or hidden hinges
- Optional anti-lever system
- Cylinder lock (antibumping option)  
(see options on page 63)
- Silver anodized door threshold

**AVPLUS 9**  
Colour: RAL 9005  
Glass type: Matt  
Accessory: 139  
Details: Stainless steel

## DOORBLOCK SYSTEM 65

Complete bonded door system  
on both sides

- 65 mm frames
- Panel thickness: 65 mm
- Aluminium sheet thickness: 1.2 mm
- Glass thickness for fixed sides: 24, 45 and 54 mm  
(Consult other values)
- Core EPS ( $d=40 \text{ kg/m}^3$ )
- Maximum door height: 3.000 mm
- Maximum door width: 1.800 mm

Every system is mainly composed by:

- Aluminium frame and leaf in lacquered or decorative foil
- Flush frame and leaf
- Triple joint
- Solid panel or panel with triple laminated glass and double chamber for better insulation
- Thermal seal with shear-free insulating profile (p. 15)
- 3 or 5 points lock
- Visible hinges
- Optional anti-lever system
- Cylinder lock (antibumping option)  
(see options on page 63)
- Silver anodized door threshold

**SELLA**  
Colour: RAL\_7021  
Glass type: Matt  
Accessory: 216

**AVPLUS 1**  
 Colour: RAL 7021  
 Glass type: Diamond matt  
 Accessory: 135

## SHEAR-FREE INSULATING PROFILE

Minimizes the longitudinal expansion produced by the outside-inside temperature difference

This polyamide keeps the door in perfect shape even when there are extreme differences between the external and internal temperature. It consists of two intermeshing parts which, with temperature-related, differing linear expansion of the inner and outer shells, the two parts move against one another.

This generates a moveable, corrective insulating zone which minimises the bi-temperature effect and reduces deformation effectively.

In an aluminium assembly with a conventional insulating profile, the large temperature difference causes the door to become deformed.

When the shear-free insulating profile is used, the differing linear expansion values of the inner and outer shells are evened out effectively.

### BENEFITS:

- No shear: minimization of the bi-temperature effect compared to flexible and rigid profiles to shear
- Minimum elastic shear stiffness  $c$  and low shear strength  $T$
- Optimized geometry for high transverse tensile strength  $Q$
- Can be assembled and coated as a traditional insulating profile

**IGUAZÚ**

Colour: Mountain Oak foil  
Glass type: Coloured diamond  
Accessory: UNICA 7  
Details: Double direction grain

Unique set where the **grain** is arranged in two different directions according to the sections: horizontal or vertical.

Seven individual pieces treated with care and giving a highly appearance of a true wooden door.

**CASIOPEA**  
Colour: Foil 1540925  
Sahara Oxide  
Accessory: Guadiana  
Details: Curved surface

Majestic design, with the pull **handle** as the undisputed protagonist, acting like a connecting element between the two panel levels: the flat part of the panel and the curved part, which bends allowing a perfect handgrip on its opening.

Design and ergonomics for a astounding result.

**ERÍDANO**

Colour: Foil 20057004 Desert Oak and anthracite grey resin  
Finish: Wood imitation, steel straps and resin works  
Details: Stainless steel straps, aligned with the fixed sides

With the contrast as a purpose, this piece with organic shapes inspired by the nature, is added to create a three-dimensional experience and unique sensations to the touch.

**ANTARES**

Made of resin, with a smooth textured part and another rough textured with a spatula effect. Finished in bronze and handle covered with python leather texture

ÚNICA 1

Handle 252

**PERSEO**

With a centre handle in glass, design from which grows a surrounding linear grooving

ÚNICA 3

ÚNICA 4

ÚNICA 5

**CETUS**

Resin door with three-dimensional shapes providing a sensation of depth and movement. Aged copper finished.

MA 7

NAT 7

**DRACO**

Unique design made of resin, rough textured in a geometric design with the handle and aged gold finished

**FÉNIX**

Three-dimensional artwork captured on a door, creating an exclusive result, finished in silver

**CENTAURO**  
Colour: Aged concrete  
Accessory: ÚNICA 6

Resin decorated door,  
with a smooth texture  
and finished in aged  
concrete creating  
amazing shades.

The textured handle  
with python skin  
rounds up the  
set with harmony.

**AQUILA**  
Colour: Oxide resin  
Accessory: Aquila  
Details: Three-dimensional surface

Set consisting of overlapping pieces of different sizes and depths, with rough texture and oxide imitation finish, resulting in a powerful and eye-catching visual style

## INNOVATION

Opening system with a **hidden handle**, longitudinally drawn (parallel to the edge of the panel), with an ergonomic opening for a comfortable inner hand grip, giving a clean surface to the door appearance and avoiding any overlapping elements.

This system also allows the incorporation of a LED lighting, a flexible strap that perfectly fits inside the handle and gives a dim light, providing a brilliant result to the door overall assembly.

The size and position of this handle is totally customizable and adaptable to the design of each door, either in the same panel finish or a different one to get a contrast.

## OPENING SYSTEMS

### FINGERPRINT READER

- 150 prints storage
- Quick response (fingerprint identification in 10 ms)
- High security
- Dimensions: 45 x 75 x 29 mm (H x W x D)
- Adhesive fixing system
- Remote control to reset
- The door unlocks and opens automatically
- In case of an obstacle detection, the door stops

### OPENING BY CODE OR BLUETOOTH

- Option to open by code on your touch screen
- Option to open from the mobile phone via Bluetooth (with touch confirmation on optional keyboard)
- The door unlocks and opens automatically
- In case of an obstacle detection, the door stops
- Once closed, the lock is automatically locked
- Control of functions through a mobile application compatible with iOS and Android (lighting, tone, temporary user blocking ...)

### ELECTRONIC HANDLE

- Reader integrated into the handle
- Bluetooth connection
- Control through mobile application compatible with iOS and Android
- Opening options: from smartphone, from smartphone with PIN input in the application, from smartphone when at least 10 m away from the device or with proximity badges and tags
- Allows the saving of an event history, erasing of lost or stolen credentials and send remote authorizations
- Temporary user blocking option
- Battery up to 50,000 openings (low battery warning in the application)
- Works without an internet connection, through encrypted protocols

### MOTORIZED OPENING

- Hinged door system with easy access
- It allows to open and close doors automatically
- Activated by push button, remote control or acoustic signals
- Barrier-free system, ideal for people with reduced mobility (slow speed mode)
- Stops and reverses if an obstacle is encountered
- The mechanism is invisible when the door is closed, once it is integrated into the frame
- Manual, automatic or pushing option
- Maximum door width: 1,100 mm
- Maximum door weight: 125 kg

**AVPLUS 12**  
 Colour: RAL\_7016  
 Glass type: Matt  
 Accessory: 140  
 Details: Stainless steel

**ACCESSORIES**

**ELECTRONIC SPYHOLE**

- 3.2 inch digital spyhole
- Good visibility even in low light conditions
- 105° viewing angle
- Easy installation and handling
- For panels from 24 to 100 mm thick
- Battery: 2x AAA batteries

**FRESNO**  
 Colour: RAL\_7021  
 Glass type: Matt  
 Accessory: 123  
 Details: Embero lacquered piece

Detail lacquered piece TARACEA collection

**DIGITAL WIRELESS SPYHOLE**

- Control and visualization through mobile application
- 2 inch screen
- 105° viewing angle
- Photo and video mode
- Easy installation and handling
- For panels from 38 to 100 mm thick
- Rechargeable lithium battery

**CARINA**  
 Colour: Foil EF1541083  
 Glass type: Matt  
 Accessory: CARINA  
 Details: Glass piece

The **glass** piece takes a leading role in this design, achieving an exceptional gloss in black, enhanced by the geometric fitting with the accessory

## HINGES

### VISIBLE HINGE

- Two-body hinge
- Leaf weight: up to 100 kg (with 3 hinges)
- Economical option

### VISIBLE HINGE (DOORBLOCK SYSTEM 65)

- Self-mounting hinge for doors in European market
- Supplied pre-assembled
- Allows quick and easy mounting on already mounted frames, allowing a correct positioning of the hinge while tightening the screws
- Detachable stainless-steel shaft, locked in place by a 2.5 mm Allen hinge, accessible only when the door panel is open (anti-theft). The panel can be detached from the structure without the need to dismount the hinge

### HIDDEN HINGE 1

- For doors with high aesthetic requirements
- Adjustable in four directions
- Leaf weight: up to 120 kg (with 3 hinges)
- Maximum opening angle 105° (requires floor stop from 95°)
- High security level
- Maintenance-free
- Includes thermal break

### HIDDEN HINGE 2

- Best highlighting of the door design
- Neutral colours: black or silver
- Leaf weight: up to 140 kg (with 3 hinges)
- Maximum opening angle 110°
- Frame material: aluminum
- Long service life: 400,000 opening cycles
- Corrosion resistance DIN EN 1670
- Maintenance-free (self-lubricating bushing)
- No heat loss (continuous sealing)

## CYLINDER LOCKS AND SECURITY SYSTEMS

### STANDARD SAFETY CYLINDER

- Double profile
- Flat nickel-plated brass key with 6 pistons
- Anti-drill bar in the cylinder body
- 30° DIN cam
- Property card
- Standard security level

### MAXIMUM SAFETY CYLINDER

- Double nickel-plated European profile
- Double function (opening with key inserted)
- Encryption with 14 pistons
- Reversible nickel silver key
- Registered and protected key profile
- Bumping resistant
- Drill protection on body and rotor
- Stainless steel encryption pistons
- Anti-extraction bar
- 30° DIN cam
- Property card

### HIDDEN ANTI-LEVER SYSTEM

- Anti-lever safety lock with double reinforcement hinge

### HIDDEN DOOR CLOSER

- Integrated door closers are fully housed inside the door leaf. The sliding guide is only visible when the door is opened. The strength and speed of closing, the hydraulic final stroke and the hydraulic damping on the opening can be conveniently adjusted during the installation.

Maximum weight: 130 kg  
Maximum length: 1.100 m  
Maximum opening: 120°

## LOCKS

3 POINTS LOCK

5 POINTS LOCK

### AUTOMATIC LOCK

Two self-locking solid hooks automatically engage the large locking from behind and make it effectively hard to break through the door, thus increasing the security, while the two sealing elements ensure the perfect closure

### ENTRY PHONE

Allows a temporary activation of the door, with simple one-handed operation or motorized unlocking

### MOTORIZED LOCK

Triple-security motorised lock which enables doors to be locked and unlocked with a high degree of comfort, security and airtightness
